Thanks, did [] just do ambient or cryo as well? And did we know the types of tires that were used?

Ksenija,

Yes, the owner would be open to giving tours of our plant. [Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] is where we do the majority of the processing, It is also where we bag the finished product. If you want to see both sites, they are [Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] from each other. Let me know if you want to schedule a day to come out.

Thank you,

--

Hi there,

A couple of weeks ago, we spoke about the US EPA's federal research on the use of tire crumb in sports fields. I mentioned that as part of the federal action plan, the U.S. EPA, and potentially CDC, too, will be visiting a few manufacturing facilities to observe the recycling process. We are looking to determine good candidates for a tour planned in the second half of May or very early June. I spoke to you about some of [REDACTED] processing, but did not check:

- Whether the owner would be open to having the EPA, and possibly, CDC and/or CPSC come in for an observational tour?
- How much of the market for tire crumb infill for sports turf [REDACTED] covers (a rough estimate would be fine)?
- What is [REDACTED] best location to see the processing of tires into tire crumb [REDACTED]

Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]

Thank you so much and all the best,
Ksenija
